

CME Booster

With inlet pressure switch

TM06 3876 1115

Fig. 1 CME Boosters with inlet pressure switch

The compact Grundfos CME Booster is suitable for water supply in domestic applications. The integrated speed controller keeps a constant pressure in the pipe system. The pressure sensor constantly monitors changes in the discharge pressure of the pump and changes the speed of the pump accordingly.

The inlet pressure switch prevents the pump from operating in case of low inlet pressure.

The booster is very easy to install. When the booster has been connected to the pipework, it is all a matter of plugging the plug into a socket, and the system is operational.

The CME Booster consists of these components:

- CME pump with integrated frequency converter
- 5-way fitting with or without non-return valve*)
- diaphragm tank
- pressure gauge
- pressure sensor
- inlet pressure switch mounted on stainless or brass fitting.*)

*) Depending on the model.

Applications

The CME Booster is mainly used for domestic and light commercial water supply or pressure boosting.

Application	CME 1	CME 3	CME 5	CME 10
Single-family houses	●	●	○	○
Two-family houses	○	●	●	●
Cluster houses		●	●	●
Blocks of flats		●	●	●
Schools		●	●	●
Small hotels/guest houses		●	●	●
Small office buildings		●	●	●
Agriculture		○	●	●
Irrigation		○	●	●

- Recommended
- Applicable.

Features

- Constant pressure via integrated speed control
- compact, robust, stainless steel design
- easy installation
- dry-running protection
- low noise
- inlet pressure switch with manual or automatic restart.

Selection guide

Example: sizing and selection

Find the right booster

- How many taps? 6.
 - How many floors? 3.
- Result: CMBE 1-75

TM05 9319 3713

Number of floors	Number of taps			
	1-5	6-10	11-20	21-50
4	CMBE 1-75	CMBE 1-75	CMBE 3-62	CMBE 3-93
3	CMBE 1-44	CMBE 1-75	CMBE 3-62	CMBE 3-62
2	CMBE 1-44	CMBE 1-44	CMBE 3-62	CMBE 3-62
1	CMBE 1-44	CMBE 1-44	CMBE 3-30	CMBE 3-62

Fig. 2 Selection guide

Preconditions:

- 3 bar tap pressure. If you want 4 bar pressure, move 2 floors up in the table.
- Flooded suction and 0.5 l/s average per tap. Demand factor has been taken into account.

Grundfos cannot be held responsible for wrong sizing based on this guide.

Materials

Component	Material
Terminal box	Composite PC/ASA and silumin (Alu)
Stator housing	Silumin (Alu)
Fan cover	Composite PBT/PC
Pump housing	Stainless steel, EN 1.4301/AISI 304
Shaft and impeller	Stainless steel, EN 1.4301/AISI 304
Flange	Cast iron

Thermal protection

CME Booster pumps require no external motor protection. The MGE motor incorporates thermal protection against slow overloading and blocking (IEC 34.11: TP 211).

Control panel

The control panel on the E-pump terminal box makes it possible to change the setpoint settings manually.

MGE 0.55 to 1.5 kW

The operating condition of the pump is indicated by the Grundfos Eye on the control panel. See fig. 4, pos. A.

Fig. 4 Control panel on CME pump

Set the desired setpoint by pressing ⊕ or ⊖. The light fields on the control panel will indicate the setpoint set. Continuously pressing ⊖ will stop the pump.

Pressing ⊗ will enable IR communication with the Grundfos GO and with other products of the same type using IR communication.
